## PARALLEL GENERATION RIDER

### AVAILABILITY

Service is available under this Parallel Generation Rider (Rider) at points on Flint Hills Rural Electric Cooperative's (Cooperative) delivery system for Members that desire to interconnect in parallel a Distributed Energy System owned by the Member to the Cooperative's delivery and metering system. This Distributed Energy System will be installed on the Member's secondary system behind the Member's active retail electric meter.

The Cooperative will make parallel generation service under this Rider available to Members on a first-come, first-served basis until the Cooperative's aggregate Export capacity from all Distributed Energy Systems, including systems that are subject to this Rider and systems that are subject to the Cooperative's Net Metering Rider, equals or exceeds the following:

- (A) Commencing on July 1, 2025, 6% of the Cooperative's historic retail peak demand; and
- (B) Commencing on July 1, 2026, 7% of the Cooperative's historic retail peak demand; and
- (C) Commencing on July 1, 2027, and each year thereafter, 8% of the Cooperative's historic retail peak demand.

Upon reaching any of the above-described limits, no further service shall be available under this Rider unless approved by the Cooperative. Historic peak demand for the purpose of this Rider and the Net Metering Rider shall not include additional demand of any new or expanded facility of an industrial, commercial or data center member that receives electric service at a voltage of 34.5 kilovolts or higher and commences service on or after July 1, 2025.

The cooperative's bylaws, rules and regulations are supplemental to this schedule and are incorporated herein.

Sheet 2 of 5

The Cooperative may limit the export capacity of additional distributed energy systems to be connected to the Cooperative's system due to the capacity of the distribution line to which such distributed energy system will be connected.

Member may elect to change between this Rider and the Net Metering Rider if applicable, available, and with approval from the Cooperative.

### **APPLICABILITY**

This Rider is applicable to Distributed Energy Systems with a Cooperative-approved and signed interconnection agreement where the Member is in good standing with Cooperative and taking service under one of the Cooperative's normal rate schedules; provided, however, this Rider shall not be applicable to any Member who has a new or expanded facility that receives electric service at a voltage of 34.5 kV or higher and commences service on or after July 1, 2025, unless approved by the Cooperative.

The Export capacity of a Member's Renewable Energy System shall be appropriately sized to the Member's anticipated electric load as follows:

- Divide the Member's historic consumption in kilowatt-hours for the previous 12-month period by 8,760 and divide such quotient by a capacity factor of a) .288; or if the Member does not have historic consumption data that adequately reflects the Member's consumption at such premises, the Member's historic consumption for the previous 12-month period shall be 7.15 kilowatt-hours per square foot of conditioned space; and round the

Sheet 3 of 5

amount determined pursuant to this section up to the nearest one kilowatt alternating current power increment.

### **CHARACTER OF SERVICE**

Alternating current, 60 cycles, at the voltage and phase of the Cooperative's established secondary distribution system immediately adjacent to the service location.

### **BILLING AND PAYMENT**

The Cooperative shall render a bill for consumption at approximately 30-day intervals during the Cooperative's normal billing process. Billing by the Cooperative to the Member shall be in accordance with the Cooperative's applicable rate schedule. For electrical energy delivered by the Member to the Cooperative from the Distributed Energy System, the Cooperative shall pay per kilowatt hour 100% of the Cooperative's Avoided Cost of purchased energy as a credit to the Member's electric bill.

### **DEFINITIONS**

- a. Avoided Cost – As defined in K.S.A. 66-1,184 et seq., the incremental cost to the Cooperative of electric energy that such Cooperative would generate itself or purchase from another source and as such term is interpreted by the Federal Energy Regulatory Commission from time to time. The Avoided Cost of energy delivered by the Member to the Cooperative from the Distributed Energy System shall be determined by the Cooperative's wholesale power provider avoided cost rate

schedule, as may be amended or superseded from time to time.

- b. Distributed Energy System – Means any device or assembly of devices and supporting facilities that are capable of feeding excess electric power generated by a Member's energy producing system into the Cooperative's system, such that all energy output and all other services will be fully consumed by the Member or the Cooperative.
  
- c. Export – As defined in K.S.A. 66-1,184 et seq., power that flows from a member's electrical system through such member's billing meter and onto the Cooperative's electricity lines. Export includes the sum of power on all phase conductors.
  
- d. Customer's Renewable Energy System - Means all customer equipment used to generate electric power from renewable energy sources within the Customer's Distributed Energy System. Customer's Renewable Energy System is the generating equipment within the Distributed Energy System.
  
- e. The terms "Member" and "Customer" and "Cooperative" and "Utility" are used interchangeably with this Rider.

### **TERMS AND CONDITIONS**

1. Service under this Rider is subject to and rendered pursuant to the Cooperative's Small Generator Interconnection Procedures, the terms and conditions of the Interconnection Agreement between the Cooperative and the Member, Members Service Agreement, the Cooperative's Rules and Regulations, and K.S.A. 66-1,184, et. seq.
