

Small Generator Interconnection Procedures

- 1.0 The Interconnection Customer (“Customer”) completes the Application for Interconnection (“Application”) and submits it to the Distribution Provider (“Flint Hills REC”) along with all applicable fees.
- 2.0 Flint Hills REC acknowledges to the Customer receipt of the Application within thirty (30) days of receipt.
- 3.0 Flint Hills REC evaluates the Application for completeness and notifies the Customer within thirty (30) Days of receipt that the Application is or is not complete and, if not, advises what material is missing.
- 4.0 Flint Hills REC verifies that the Distributed Energy System can be interconnected safely and reliably using the screens contained in the Fast Track Process and minimum load study of Flint Hills REC Distribution system. Flint Hills REC has ninety (90) Days to complete this process. Unless Flint Hills REC determines and demonstrates that the Distributed Energy System cannot be interconnected safely and reliably, Flint Hills REC approves the Application and returns it to the Customer.
- 5.0 After installation, the Customer returns the Certificate of Completion to Flint Hills REC. Prior to parallel operation, Flint Hills REC may inspect the Distributed Energy System for compliance with standards which may include a witness test, and may schedule appropriate metering replacement, if necessary.
- 6.0 Flint Hills REC notifies the Customer in writing that the interconnection of the Distributed Energy System is authorized. If the witness test is not satisfactory, Flint Hills REC has the right to disconnect the Small Generating Facility. The Customer has no right to operate in parallel until a witness test has been performed or previously waived on the Application. Flint Hills REC is obligated to schedule this witness test within ten (10) Business Days of receipt of the Certificate of Completion. If Flint Hills REC does not inspect within ten (10) Business Days or by mutual agreement of the Parties, the witness test is deemed waived.
- 7.0 Contact Information – The Customer must provide the contact information for the legal applicant (i.e. the Interconnection Customer). If another entity is responsible for interfacing with the Company, that contact information must be provided on the Application.
- 8.0 Ownership Information – Enter the legal names of the owner(s) of the Small Generating Facility
- 9.0 UL1741 Listed – This standard (“Inverters, Converters, and Controllers for Use in Independent Power Systems”) addresses the electrical interconnection design of various forms of generating equipment. Many manufacturers submit their equipment to a Nationally Recognized Testing Laboratory (NRTL) that verifies compliance with UL1741. This “listing” is then marked on the equipment and supporting documentation.
